Q4 2025 Fund Commentary

Commentary and opinions are provided by Invesco Canada Ltd..

Market commentary

Global equities rose in the fourth quarter of 2025 despite increased volatility. International stocks outperformed U.S. stocks. Artificial intelligence (AI) was a major driver of investor enthusiasm, but momentum in the U.S. faded as investors grew more cautious about high valuations on information technology stocks. Equity market leadership broadened, with value stocks showing resilience despite softening U.S. labour conditions and a U.S. government shutdown.

Emerging market equities were among the top performers, supported by a broad information technology rebound across Asia. However, results varied. South Korea saw gains fuelled by corporate governance reforms and AI-related semiconductor demand. Chinese equities fell amid weak economic data and the strengthening of its currency. European equities also rose, helped by the euro's appreciation against the U.S. dollar, improving manufacturing trends and expectations of fiscal stimulus in Germany.

Canadian equities rose, supported by performance in the materials and energy sectors and a strengthening Canadian dollar relative to the U.S. dollar. The Bank of Canada held interest rates steady in December after implementing several cuts earlier in the year.

Performance

The Fund's relative exposures to Coherent Corp., Royal Bank of Canada and Bombardier Inc. contributed to performance. Coherent, a supplier to AI data centres, benefited from demand for its optical transceivers, which are critical to AI infrastructure. Royal Bank of Canada posted strong profits, improving returns and solid book value growth. Its HSBC Canada integration has gone well, and Royal Bank of Canada's earnings were aided by capital markets demand. Bombardier saw rising bookings and healthy demand across its business lines.

Relative exposures to Parsons Corp., Arm Holdings PLC and BAE Systems PLC detracted from the Fund's performance. The stock of Parsons was pressured after the company lost a Federal Aviation Administration air traffic control contract to a competitor, an outcome that surprised many. Arm Holdings saw its stock fall because of investor concerns about the current stage of the AI cycle. BAE Systems was affected by investor concerns around a potential peace deal in Ukraine, which could slow Europe's rearmament.

At the sector level, stock selection in the information technology sector and exposures to the consumer discretionary and communication services sectors contributed to the Fund's performance. Security selection in the materials and financials sectors detracted from performance, as did overweight exposure to the industrials sector.

At the regional level, selection within the U.S. and Israel contributed to the Fund's performance, as did underweight exposure to the U.S. and no exposure to China and Germany. Stock selection in Canada and Japan detracted from the Fund's performance.

Portfolio activity

The sub-advisor added a holding in ATCO Ltd. to the Fund for the company's low risk and high-quality growth. Arm Holdings was added as the company's designs are being adopted in cloud-computing data centres and servers, where the company gets higher royalty rates. A holding in Premium Brands Holdings Corp. was added to the Fund as the sub-advisor believes the company could see higher accelerating organic growth, driven by its specialty foods segments and U.S. expansion initiatives. A holding in Ivanhoe Mines Ltd. was added for exposure to copper growth through the company's Kamoa-Kakula mine. A holding in Canadian Imperial Bank of Commerce (CIBC) was added to the Fund based on growth in CIBC's Canadian private and business banking division.

The sub-advisor added to the Fund a holding in AGF Management Inc. after the company's stock declined because of concerns about the company's private markets business.

Holdings in Cenovus Energy Inc. and MEG Energy Corp. were sold following Cenovus's acquisition of MEG Energy. The sub-advisor sees a better risk-reward profile in Suncor Energy Inc. A holding in ConocoPhillips was sold because of the company's weak earnings and quality trends. The sub-advisor sold the Fund's holding in Celestica Inc. after a period of strong share price performance. Although the company provides hardware exposure to AI infrastructure, the holding was sold in favour of what the sub-advisor sees as higher-quality growth opportunities. A holding in Anheuser-Busch InBev SA was sold because of the company's weaker earnings compared to other holdings of companies in the consumer staples sector.

The Fund's holding in Bank of Montreal was reduced to manage its weight in the Fund's and to help fund the purchase of a holding in CIBC. A holding in Coherent was reduced to manage its weighting in the Fund as the company's stock price rose.

Outlook

The sub-advisor is focused on applying a long-term investment process that seeks to invest in attractively valued, high-quality growth companies. The sub-advisor believes geopolitical and macroeconomic concerns may remain elevated but still has an optimistic outlook for the coming months.

*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

[^]Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

[†]Soft capped - Contributions are no longer accepted to new investors., [‡]Hard capped - Contributions are no longer accepted.

Distribution of the chart, history standard and short-term reports are not permitted without including the fund profile long-term report. A description of the key features of Canada Life's individual variable insurance contract is contained in the information folder, available from your advisor. FundGrade A+[®] is used with permission from Fundata Canada Inc., all rights reserved. The annual FundGrade A+[®] Awards are presented by Fundata Canada Inc. to recognize the "best of the best" among Canadian investment funds. The FundGrade A+[®] calculation is supplemental to the monthly FundGrade ratings and is calculated at the end of each calendar year. The FundGrade rating system evaluates funds based on their risk-adjusted performance, measured by Sharpe Ratio, Sortino Ratio, and Information Ratio. The score for each ratio is calculated individually, covering all time periods from 2 to 10 years. The scores are then weighted equally in calculating a monthly FundGrade. The top 10% of funds earn an A Grade; the next 20% of funds earn a B Grade; the next 40% of funds earn a C Grade; the next 20% of funds receive a D Grade; and the lowest 10% of funds receive an E Grade. To be eligible, a fund must have received a FundGrade rating every month in the previous year. The FundGrade A+[®] uses a GPA-style calculation, where each monthly FundGrade from "A" to "E" receives a score from 4 to 0, respectively. A fund's average score for the year determines its GPA. Any fund with a GPA of 3.5 or greater is awarded a FundGrade A+[®] Award. For more information, see www.FundGradeAwards.com. Although Fundata makes every effort to ensure the accuracy and reliability of the data contained herein, the accuracy is not guaranteed by Fundata.
