## Q4 2025 Fund Commentary

*Commentary and opinions are provided by Mackenzie Investments.*

### Market commentary

Canada's economy showed signs of strain in the fourth quarter as U.S. tariffs and weakening trade flows continued to pressure manufacturing and export-oriented sectors. Business confidence softened, and labour-market momentum faded, although household spending remained stable heading into year-end.

The Bank of Canada held its policy rate at 2.25% in December following its 25-basis-point rate cut in October, citing moderating inflation and persistent economic uncertainty. Canada's unemployment rate rose to 6.8% in December, as labour-force growth outpaced hiring and trade-sensitive industries showed renewed weakness.

The Canadian fixed income market delivered modest gains in the fourth quarter given easing inflation and a stable policy stance towards the end of the quarter. The yield on the 10-year Government of Canada bond ended December at 3.43%, up from 3.18% at the beginning of the quarter. Government bond prices moved lower and underperformed corporate bonds, which gained. High-yield bonds also rose, supported by the late-year rally in equities and investor demand for carry in a lower-rate environment.

### Performance

Relative exposure to Canada Housing Trust No. 1 (1.9%, 2026/09/15) bonds contributed to the Fund's performance. Backed by insured residential mortgage assets, the bond is generally viewed as a defensive holding. A holding in Province of Alberta (2.05%, 2030/06/01) bonds detracted from performance. Provincial returns fell as yields rose.

At a sector level, short-term federal bond exposure contributed to the Fund's performance. Exposure to provincial bonds detracted from the Fund's performance.

### Portfolio activity

The Fund's holding in Canada Housing Trust No. 1 (1.95%, 2025/12/15) bonds was sold as the bond reached its maturity date. The sub-advisor reduced a holding in Canada Housing Trust No. 1 (1.9%, 2026/09/15) bonds because of Fund flow management, with proceeds going to meet liquidity needs.

\*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

<sup>^</sup>Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

<sup>†</sup>Soft capped - Contributions are no longer accepted to new investors., <sup>‡</sup>Hard capped - Contributions are no longer accepted.

Distribution of the chart, history standard and short-term reports are not permitted without including the fund profile long-term report.
