## Q4 2025 Fund Commentary

*Commentary and opinions are provided by TD Asset Management Inc..*

### Market commentary

In the fourth quarter of 2025, Canada experienced modest, below-trend growth, consistent with a gradual cooling rather than a sharp downturn. Economic momentum slowed as the effects of past interest rate hikes, softer population growth and more cautious consumer behaviour weighed on activity. Inflation remained close to the Bank of Canada's (BoC) 2% target, allowing the policy focus to shift from aggressively containing price pressures toward supporting a still-fragile economic expansion.

The BoC held its policy interest rate steady at 2.25% in December after easing earlier in the second half of the year. With inflation broadly under control and growth subdued, policymakers emphasized the need to assess the effect of prior interest rate cuts.

Canadian fixed income markets were challenged by a broad-based rise in Government of Canada (GoC) yields, which weighed on price performance. Yields on two-year GoC bonds increased by nearly 12 basis points, while 30-year yields rose by 23 basis points. This resulted in a steepening of the yield curve.

Corporate bonds outperformed the broader market, supported by higher yield levels and resilient income carry. Credit spreads were stable, allowing corporate bonds to better absorb the impact of rising government yields.

### Performance

The Fund is a passive index strategy designed to track the FTSE Canada Universe Bond Index, while excluding BBB-rated bonds at the time of purchase. During the quarter, a lack of BBB-rated bond holdings detracted from the Fund's performance.

### Portfolio activity

As a passive index strategy, the sub-advisor made no notable changes to the Fund during the quarter.

### Outlook

The sub-advisor has a cautiously optimistic outlook. Growth is expected to remain modest into 2026, with risks skewed more toward slower activity than a renewed inflation surge. The BoC has signalled that future policy moves will be data-dependent, balancing inflation uncertainty against a gradually weakening Canadian labour market. In this setting, fixed income should offer attractive yields, diversification benefits and potential downside protection relative to riskier assets.

The BoC is likely to hold its policy interest rate steady and proceed with caution, balancing inflation uncertainty against a weakening labour market.

From a credit perspective, strong fundamentals and favourable technical conditions should support the Canadian corporate bond sector.

\*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

<sup>^</sup>Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

<sup>†</sup>Soft capped - Contributions are no longer accepted to new investors., <sup>‡</sup>Hard capped - Contributions are no longer accepted.
