

CAN Canadian Growth Balanced II 75/100 (PS1)†

March 31, 2026

A value equity fund that invests in a broad range of small- to large-cap Canadian companies to seek a balance between growth and interest income.

Is this fund right for you?

- You're looking to preserve your investment while still allowing it to grow.
- You want to invest in the common shares (or their equivalents) of Canadian companies and fixed-income investments.
- You're comfortable with a low to moderate level of risk.

Q4 2025 Fund Commentary

Commentary and opinions are provided by Mackenzie Investments.

Market commentary

Canada's economy showed signs of strain in the fourth quarter as U.S. tariffs and weakening trade flows continued to pressure manufacturing and export-oriented sectors. Business confidence softened, and labour-market momentum faded, although household spending remained stable heading into year-end.

The Bank of Canada held its policy rate at 2.25% in December following its 25-basis-point rate cut in October, citing moderating inflation and persistent economic uncertainty. Canada's unemployment rate rose to 6.8% in December, as labour-force growth outpaced hiring and trade-sensitive industries showed renewed weakness.

The Canadian fixed income market delivered modest gains in the fourth quarter given easing inflation and a stable policy stance towards the end of the quarter. The yield on the 10-year Government of Canada bond ended December at 3.43%, up from 3.18% at the beginning of the quarter. Government bond prices moved lower and underperformed corporate bonds, which gained. High-yield bonds also rose, supported by the late-year rally in equities and investor demand for carry in a lower-rate environment.

North American equity markets rose. The S&P/TSX Composite gained, with materials sector strength offsetting a softer energy sector. The S&P 500 Index also advanced as earnings held up. Market leadership began to widen, with more defensive companies improving while information technology and communication services remained influential. Lower oil prices weighed on energy shares.

Performance

Stock selection in the real estate and utilities sectors contributed to the Fund's performance. An underweight allocation to the consumer staples sector also contributed to performance. A holding in Aritzia Inc. and a lack of exposure to Enbridge Inc. contributed to performance. Aritzia reported strong U.S. revenue growth in November.

Stock selection in the information technology, financials and health care sectors detracted from the Fund's performance. An overweight allocation to, and stock selection in, the industrials sector also detracted from performance. Holdings in Linde PLC and Fastenal Co. detracted from performance. Slow activity in the industrials sector dampened short-term sentiment for Linde. Fastenal's stock price fell as investors took profits after it reached an all-time high in August.

In fixed income, shorter corporate bond exposure contributed to the Fund's performance, while an underweight and longer duration (sensitivity to interest rates) exposure to federal government bonds detracted from performance. A holding in Government of Canada (3.25%, 2035/06/01) bonds detracted from performance.

Portfolio activity

A holding in Eli Lilly and Co. was added to the Fund. The sub-advisor believes the company has strong growth prospects after a difficult period for the health care industry after the COVID-19 pandemic. A holding in Barrick Mining Corp. was added to increase exposure to gold. A holding in CPPIB Capital Inc. (4.3% 2034/06/02) was also added during the quarter.

CAN Canadian Growth Balanced II 75/100 (PS1)†

March 31, 2026

A Fund holding in Alphabet Inc. was increased to capture the upside in what the sub-advisor views as an early artificial intelligence (AI) leader. A holding in Amphenol Corp. was increased as the sub-advisor believes the company does well serving diverse industries with AI infrastructure opportunities.

A Fund holding in Verisk Analytics Inc. was sold as the sub-advisor believed AI-enabled removal of intermediaries cooled investor sentiment. A holding in Marsh & McLennan Cos Inc. was sold to reduce exposure to property and casualty insurance as margins tighten.

The Fund's holdings in Automatic Data Processing Inc. and Constellation Software Inc. were reduced.

CAN Canadian Growth Balanced II 75/100 (PS1)[†]

March 31, 2026

*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

[^]Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

[†]Soft capped - Contributions are no longer accepted to new investors., [‡]Hard capped - Contributions are no longer accepted.
