

CAN Long Term Bond 100/100 (PS2)†

March 31, 2026

A Canadian fixed-income fund that provides an opportunity for income generation over the longer term.

Is this fund right for you?

- You want to protect your money from inflation while also protecting it from large swings in the market.
- You want to invest in long-term Canadian government and corporate fixed-income securities, with some exposure to foreign fixed-income securities.
- You're comfortable with a low to moderate level of risk.

Q4 2025 Fund Commentary

Commentary and opinions are provided by Canada Life.

Market commentary

In the fourth quarter of 2025, bond yields rose because of better-than-expected economic results. Gross domestic product came in better than expected, inflation moderated and employment was stronger than expected. There was limited economic data from the U.S. due to the 43-day U.S. government shutdown in the fall of 2025.

The Bank of Canada (BoC) cut its overnight lending rate in October and left the rate at 2.25% in December. Despite the government shutdown in the U.S., the U.S. Federal Reserve Board (Fed) opted to cut interest rates, bringing its federal funds rate down to 3.75% by year-end. Both headline and core Consumer Price Index rates have started to decline, but both remain higher than the Fed's 1–3% target band.

Performance

Underweight exposure to Province of Quebec (2.85%, due 2053) bonds contributed to the Fund's performance. Overweight exposure to PSP Capital Inc. (4.25%, due 2055) bonds detracted from performance. Both bonds returned weak performance.

Overweight exposure to corporate and municipal bonds and underweight exposure to federal bonds contributed to the Fund's performance. Federal bonds were the weakest performers during the quarter. Longer duration (interest rate sensitivity) than the benchmark detracted from the Fund's performance, particularly in December, when interest rates rose.

Portfolio activity

A 30-year new issue from TransCanada PipeLines Ltd. was added to the Fund. The pipeline sub-sector saw strong performance compared to other energy sub-sectors. Adding this bond to the Fund's holdings helped the sub-advisor take advantage of this outperformance. Longer-term provincial bonds, including those issued by Alberta, British Columbia and Ontario, were increased as corporate bond spreads were narrow.

Corporate holdings in the infrastructure space that were no longer index-eligible were sold, replaced with longer-dated assets. Exposure to Metro Inc. bonds was reduced to take advantage of spread performance.

March 31, 2026

Outlook

Going forward, the market expects the BoC to increase interest rates late in 2026 with a 0.25% hike priced in. The Fed is expected to make two additional cuts of 0.25% each to its federal funds rate in the first half of the year.

Although in the near term the sub-advisor doesn't expect bond spreads to widen, there is also limited room for corporate spreads to narrow. The sub-advisor has reduced the Fund's overweight allocation slightly, providing room for additional purchases at more attractive spread levels.

The sub-advisor sees the potential for yield curve flattening into the first quarter of 2026 and is migrating the Fund's portfolio to benefit from that movement in the yield curve. Issuance of government-related debt will be monitored to determine what impacts there will be on the yield curve.
