Q3 2026 Fund Commentary

Commentary and opinions are provided by Keyridge Asset Management Limited.

Market commentary

The listed private equity market, made up of publicly traded companies that invest in or manage private businesses, rose from June into mid-August as the fundamental backdrop for private equity improved. The exit environment, which is the market for selling private holdings, was the main source of that improvement. The market gave back much of that gain over the rest of the quarter and finished only modestly higher.

Performance

Country positioning contributed the most to performance during the quarter. An underweight allocation to Australia and modest overweight allocations to the U.K. and Japan each contributed.

Overweight exposures to Syncona Ltd., Bridgepoint Group PLC and Georgia Capital PLC contributed to performance.

Underweight exposures to certain risk factors, in particular stocks with value and quality characteristics, detracted from performance.

The sub-advisor doesn't hold Washington H. Soul Pattinson and Co. Ltd., which is an environmental, social and governance exclusion, and that absence detracted from performance. The company carries a large weight in the benchmark, which makes the exclusion a significant driver of the Fund's results. Overweight exposure to Onex Corp. also detracted from performance.

Portfolio activity

The sub-advisor rebalanced the portfolio on September 23 and adjusted all positions accordingly. The sub-advisor increased Apollo Global Management Inc., Brookfield Asset Management Ltd., Onex and Alaris Equity Partners Income Trust. The sub-advisor sold WhiteHorse Finance Inc., MidCap Financial Investment Corp. and Crescent Capital BDC Inc. The sub-advisor reduced The Carlyle Group Inc., KKR & Co. Inc. and 3i Infrastructure PLC.

Outlook

In the sub-advisor's view, the outlook for listed private equity remains mixed, though the fundamentals are improving. A recovery in private equity exits and resilient deal activity could support that improvement. At the same time, renewed inflationary pressure has pushed U.S. interest rates higher, which raises financing costs and credit risk. The sub-advisor believes performance in the fourth quarter could be sensitive to the path of U.S. interest rates.
